UB Campus Safety

Demo # 1

Tamika Chen | Raynisha Cornelio | Javier Castellanos | Alex Peraza | Abner Mencia

OUR COMPANY

Aims to transform traditional campus safety measures, typically managed through manual methods, into a streamlined digital experience accessible via a mobile application.

PROBLEM

- Lack of a comprehensive and user-friendly Campus Safety App.
- Inadequate convenience and real-time information dissemination.
- Growing demand for a centralized crisis response platform.
- Insufficient real-time warnings and location-based help.

SOLUTION

- The proposed Campus Safety App for the University of Belize will be a comprehensive mobile application designed to meet the diverse safety needs of students, faculty, and staff.

STAKEHOLDERS / ACTORS

- **University of Belize** - responsible for providing the database of enrolled student IDs
- **Students / Faculty / Staff** - will be able to make incident reports, call for help, activate panic button, and edit profile
- **Security Guards** - has the ability to clock in / out, receive calls, view UB - AR Map, log reports and receive tasks
